

## Fact sheet: Cantonal allocations of persons with protection status S

As of: 08.11.2022 – published weekly

- Persons who apply for asylum or protection in Switzerland are allocated to the cantons in proportion to the size of the canton's population once their application has been examined and a decision has been made. The cantons have agreed on this [allocation key](#).
- **Not included** in the cantonal allocation figures below are:
  - Persons who have not submitted an application for protection status S, but who reside in a canton;
  - Persons who have registered via the 'RegisterMe' web portal, are resident in a canton and whose application has not yet been processed.

The figures below may therefore differ from the number of persons actually in the cantons.

### Explanations

- Allocation key in relation to size of pop-ulation: Canton's share of the overall Swiss population.
- Actual allocation: Number of protection seekers allocated to the respective canton to date. There is a time lag between the point when a person is allocated to a canton and when they leave the federal asylum centre and arrive in the canton.
- Nominal allocation: Number of protection seekers who would should be allocated to a canton according to the allocation key.
